COLORBOND® Metallic steel

Citi®

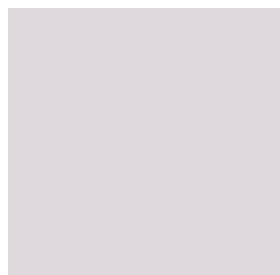

Skybridge®

Cortex®

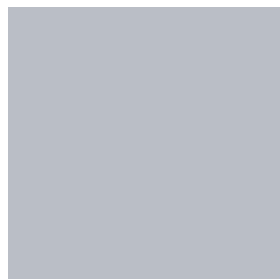

Axis®

Facade®

Conservatory®

INDUSTRIAL COMMERCIAL

COLOUR

With a broad range consisting of 26 standard colours, including metallics, to complement and enhance any building design.

DESIGN FLEXIBILITY

COLORBOND® steel is a leader in flexibility of design. Steel roofing and walling delivers excellent spanning capabilities for efficient structures, allowing for more column free floor area and to maximise the efficiency of your structural framing, whilst the ability to incorporate low roof pitches and even curves adds to the aesthetic possibilities.

THERMAL EFFICIENCY

The most exposed element of a building is its roof and therefore is an extremely important element in designing an energy efficient building. Roofing made from COLORBOND® steel can assist in controlling the amount of heat entering your building. The use of Thermatech™ in the new paint technology means that on average across the entire colour range, there is an increase in solar reflectance by 5%. For more detailed information please visit www.colorbond.com

LEADING EDGE TECHNOLOGY

COLORBOND® steel is one of the most advanced roofing and walling materials in the world. Starting with a ZINCALUME® steel base for outstanding anti-corrosion performance. Then, a conversion layer is chemically applied to enhance coating adhesion. A polyester primer is then

baked onto the surface. Finally, a durable exterior grade top-coat is baked on. Now incorporating Thermatech™ technology for outstanding solar reflectance.

DURABILITY

With its corrosion resistant ZINCALUME® steel base and baked on paint finish that resists chipping, peeling and cracking, COLORBOND® steel delivers renowned long life performance with low maintenance. Its also non-combustible, termite resistant and weather tight[^], protecting your investment against our harsh Australian conditions.

WARRANTY

BlueScope Steel offers a warranty* for COLORBOND® steel for various applications. Please refer to www.colorbond.com for all warranty terms and conditions and to see which warranty may apply for your project. All warranties are backed by Australia's own BlueScope Steel.

DEVELOPING SUSTAINABLE PRODUCTS, SOLUTIONS AND TECHNOLOGIES

BlueScope Steel is committed to working towards improved environmental outcomes in our manufacturing processes. For example using recycled water and reducing our fresh water use at Port Kembla steelworks by more than 50% and using recycled steel scrap in the production of steel. COLORBOND® steel is 100% recyclable and over 85% of all steel building products are recycled.
